## EDUCATION

---

### University of Hard Knocks

GPA: 2.6/3.141592653

Bachelor of Computer Science in Creative Writing

January 2038

- Selected coursework: Spanish II, Bank Robbery Past and Present, Data Structures & Algorithms

## EXPERIENCE

---

### Chase Bank

August 2024 - Present

Software and Social Media Engineering Intern

- Increased fee revenue by 13% by creating a TikTok trend encouraging check fraud
- Ported legacy Fortran webserver to Motorola 68000 Assembly to increase maintainability

### Crowd Strike

May 2024 - August 2024

Software Engineering Intern

- Created \$10 billion in impact by enhancing CrowdStrike Sensor Detection Engine with increased security capabilities through the novel strategy of crashing the computer before viruses have a chance to attack
- Reduced 911 calls by 11%

### Meta

Past - May 2024

Misinformation Engineering Intern

- Increased online misinformation by 23% by developing and implementing proprietary shitposting techniques
- Posted so many minion memes people started to think they were funny

## PROJECTS

---

### Cancer Cure | PHP, Laravel

- Developed a cure for cancer using PHP and Laravel
- Not been released yet because I can't think of a good LinkedIn post title

### Tic-Tac-Toe Game

- Wrote a Tic-Tac-Toe game with Pygame and Python because my buddy said it would get me into quant
- It didn't

### Yes Unix Command Rust Rewrite

- Rewrote the classic yes unix command into Rust (the only moral programming language) allowing blazingly fast performance with memory safety and fearless concurrency
- Increased GitHub README emojis by 132%

### ChatGPT Wrapper

- Basically the same thing as every startup the past few years
- Achieved 100% the performance of ChatGPT

## TECHNICAL SKILLS

---

Bench Press: 225lbs

Languages: PHP, Fortran, Python 2, Motorola 68000 Assembly, Game Maker Scripts
